

Week_10_Day_02

1. I have created architecture.md file
2. I have created a folder and moved the .md file into it
3. Using the prompt given I have asked claude to implement the architecture in vse code

JS ciiDetector.test.js X

moderation-layer > tests > detectors

```
1  const ruleLoader = require('...')
2
3  ruleLoader.loadAll();
4
5  const ciiDetector = require('...')
6
7  describe('ciiDetector', () => {
8    test('detects credit card', () => {
9      const result = ciiDetector.detect('1234 5678 9010 1111 2222');
10     expect(result.action).toBe('block');
11     expect(result.severity).toBe('high');
12     expect(result.matches).toHaveLength(1);
13   });
14
15   test('clean text returns no matches', () => {
16     const result = ciiDetector.detect('This is a clean text');
17     expect(result.action).toBe('allow');
18     expect(result.matches).toHaveLength(0);
19   });
20 });
21
```

4. All the 7 phases were implemented

5. Now let's check the postman collections
