💬 Chat Input

2. Configuring the host url & api key in cdn

The screenshot shows a code editor with four tabs: 'implementat...low-chat.md', 'new 1', 'new 2' (selected), and 'new 3'. The code in the 'new 2' tab is an HTML document structure for a chat widget. It includes a script tag in the head pointing to a CDN and a configuration block in the body for 'langflow-chat' with specific host, flow ID, and API key values.

```
1 <html>
2   <head>
3     <script src="https://cdn.jsdelivr.net/gh/
4   </head>
5   <body>
6     <langflow-chat
7       host_url="http://localhost:7860"
8       flow_id="0dc97ca3-0765-442e-b5f3-955994
9       api_key="sk-9mR0ivo1s6IuaJU8_dpabZVq-Lh
10    ></langflow-chat>
11  </body>
12 </html>
13
```

3. Creating HTML file

```
1  <html>
2    <head>
3      <script src="https://cdn.jsdelivr.net/gh/langflow-ai/la
4    </head>
5    <body>
6      <langflow-chat
7        host_url="http://localhost:7860"
8        flow_id="0dc97ca3-0765-442e-b5f3-955994588995"
9        api_key="sk-9mR0ivo1s6IuaJU8_dpabZVq-LhuiDs_qe_g6D82
10       width="500"
11       height="500"
12       window_title="Test Case Generator Powered by AI"
13       online_message="You are now connected to the Test Cas
14       placeholder="Type your requirements here..."
15     ></langflow-chat>
16   </body>
17 </html>
18
19
```

4. Generated chat box for test case generator

Test Case Generator Powered by AI

- You are now connected to the Test Case Generator AI. How can we assist you today?
